### [Interior Design](#)

Captivating the attention of Ho Chi Minh's high flyers, world-class architecture and [interior design](#) firm dwp has created the stunning architecture, interiors and landscape, in the distinctive shape of an undulating loop, for the brand new EverRich II Apartments, set to an urban-style luxury.

EverRich II may well be one of award-winning dwp's most iconic South-East Asian architectural projects, which made a significant impact since introduction at the Cityscape Asia Awards 2008. At 630,000sqm, the EverRich II project is a mix-used complex with residential, recreation and retail facilities. To distract from the noise, hectic and everyday hustle and bustle of this constantly morphing, thriving metropolis concrete jungle, the project aims to be a self-sustaining community, next to the new Saigon River bridge in District 7, Ho Chi Minh City. Upon completion, EverRich II will add 3,125 apartments units, to the private housing market in Ho Chi Minh City.

Aimed exclusively at Vietnam's elite, these newly-designed apartments provide the ultimate lifestyle address for newlyweds and young couples, looking to start a family or simply enjoy the fruits of their labour together. dwp created relaxing and inspiring living spaces, perfectly matched to become the backdrop of social entertaining, enjoying a sophisticated luxury lifestyle or romantic evenings, admiring the envious unique views across the city skyline.

Everrich II ensures love is never lost with its open-plan, modern appeal. dwp created five different types of apartments: 107sqm, 116sqm, 124sqm, 155sqm and penthouses of 339sqm. Sleek, modern lines define the interiors of the apartments. For those of smaller size, the contemporary open plan sees the living room, dining room and kitchen all connected. The materials and finishes are in warm tone, to create a cozy, intimate feeling, with a touch of luxury and elegance. The use of light-coloured materials, wooden floors and expansive windows cater to almost uninterrupted views, and provide plenty of natural light, for a bright, airy atmosphere.

The master bedrooms of the apartments are breathtakingly impressive, with glassed-in, ensuite bathrooms, inclusive of elegant, rounded Jacuzzi spa-tubs. Additionally, the largest split-level penthouse additionally features a gym and sauna. Glossy tiles were used on floors and in the kitchen, together with exclusively selected luxurious furniture.

A perfect location for couples and newly-weds to relax, indulge and settle down, ever at home in the EverRich II Apartments.
